OS: Linux(Ubuntu, CentOS)
Versioning: Git
Tools: composer, npm, sass, gulp
Miscellaneous: Docker, Jenkins, Ansible, AWS, TDD, DDD, SOLID, RabbitMQ

PROJECTS

- Whoops is a web monitoring app that I'm planning to launch soon | **code**
- Calamintha is static website made for a friend | **site**
- Terminal version of my website | **code**
- PasteIT is a copy of pastebin made from scratch | **code**

EDUCATION

Faculty of Computer Science, Iași:
Software engineer bachelor's degree - Oct 2019 - Jul 2022

Colegio salesianos San Pedro, Spain:
Android training certificate - May 2018

LANGUAGES

- Mother tongue: Romanian
- Cambridge English Certificate - B2

PASSIONS

Biking | Crafting | Tutoring | Building | Learning | Reading

SUMMARY

Software engineer with four years of experience. Currently excelling at eMAG, I specialize in PHP and others, having a profound love for working with DDD and implementing DESIGN PATTERNS. Actively exploring microservices and AWS.

WORK HISTORY

SOFTWARE DEVELOPER | ROMANIA

eMAG *Jul 2022 - Present*
- Extended the functionalities of two Symfony microservices
- Created various log reports using AWS Lambda functions and CloudWatch
- Maintained and fixed various features in the return flow
- Implemented new features for the MFA authentication flow
- These contributions enhanced the security of several flows within our application

- Developed a Nuxt App and integrated it with one of the microservices, incorporating the entire CI/CD flow
- This new app will assist our business partners in managing their application integrations with our microservices

FULLSTACK DEVELOPER | ROMANIA

Testable *Aug 2021 - Jul 2022*
- Created a web browser spreadsheet editor with visual semantics
- Developed a responsive dashboard using AlpineJS and Livewire
- Integrated the Twilio SMS API with the authentication system
- These enhancements facilitated easier navigation for our users through their projects and a better understanding of the business logic

FRONTEND DEVELOPER | BELGIUM

Yogalive *Aug 2020 - Jul 2021*
- Implemented the entire design of the website using SASS
- Created a booking form for yoga classes
- All of these contributions helped establish the business brand image

ADDITIONAL INVOLVEMENTS

ERASMUS+ PROJECT

"Mihai Băcescu" Highschool *Jan 2016 - Apr 2018*
- Come up with a business idea (the idea was a traveling agency for youths)
- Work on a tourist guide for youths (www.newsforyouth.org)
- Promote the guide online (instagram.com/permetior.mapp)
- Create a paper tourist guide using Adobe InDesign

Tutoring
- Over the years, I've assisted numerous friends in entering the IT field by elucidating algorithms, imparting knowledge of data structures, collaborating on projects, and providing guidance along their learning journeys.
